This document has been reviewed in accordance with the U.S. Environmental Protection Agency's peer and administrative review policies and approved for publication. Mention of trade names or commercial products does not constitute endorsement or recommendation for use.

## **Contents**

<b>Chapter</b>	<b>Page</b>
<b>1 INTRODUCTION.....</b>	<b>1</b>
1.1 Objectives of the Guidelines .....	1
1.2 Water Demands .....	1
1.3 Source Substitution .....	2
1.4 Pollution Abatement .....	3
1.5 Treatment and Water Quality Considerations .....	3
1.6 Overview of the Guidelines .....	4
1.7 References .....	5
<b>2 TECHNICAL ISSUES IN PLANNING WATER REUSE SYSTEMS .....</b>	<b>7</b>
2.1 Planning Approach .....	7
2.1.1 Preliminary Investigations .....	7
2.1.2 Screening of Potential Markets .....	8
2.1.3 Detailed Evaluation of Selected Markets .....	9
2.2 Potential Uses of Reclaimed Water .....	10
2.2.1 National Water Use .....	10
2.2.2 Potential Reclaimed Water Demands .....	12
2.2.3 Reuse and Water Conservation .....	14
2.3 Sources of Reclaimed Water .....	14
2.3.1 Locating the Sources .....	14
2.3.2 Characterizing the Sources .....	15
2.4 Treatment Requirements for Water Reuse .....	18
2.4.1 Health Assessment of Water Reuse .....	19
2.4.2 Treatment Requirements .....	29
2.4.3 Reliability in Treatment .....	36
2.5 Seasonal Storage Requirements .....	43
2.5.1 Identifying the Operating Parameters .....	43
2.5.2 Storage to Meet Irrigation Demands .....	44
2.5.3 Storage to Prevent Surface Water Discharge .....	46
2.5.4 Partial Commitments of Supply .....	47
2.6 Supplemental Water Reuse System Facilities .....	48
2.6.1 Conveyance and Distribution Facilities .....	48
2.6.2 Operational Storage .....	54
2.6.3 Alternative Disposal Facilities .....	56
2.7 Environmental Impacts .....	59
2.7.1 Land Use Impacts .....	59
2.7.2 Stream Flow Impacts .....	60
2.7.3 Hydrogeological Impacts .....	60
2.8 References .....	60

---

## Contents (continued)

Chapter	Page
3 TYPES OF REUSE APPLICATIONS .....	67
3.1 Introduction .....	67
3.2 Urban Reuse .....	67
3.2.1 Reclaimed Water Demand .....	68
3.2.2 Reliability and Public Health Protection .....	69
3.2.3 Design Considerations .....	69
3.3 Industrial Reuse .....	72
3.3.1 Cooling Water .....	72
3.3.2 Boiler-Feed Water .....	75
3.3.3 Industrial Process Water .....	75
3.4 Agricultural Irrigation .....	76
3.4.1 Estimating Agricultural Irrigation Demands .....	79
3.4.2 Reclaimed Water Quality .....	81
3.4.3 Other System Considerations .....	86
3.5 Habitat Restoration/Enhancement and Recreational Reuse .....	90
3.5.1 Natural and Manmade Wetlands .....	90
3.5.2 Recreational and Aesthetic Impoundments .....	91
3.5.3 Stream Augmentation .....	92
3.5.4 Other Recreational Uses .....	93
3.6 Groundwater Recharge .....	93
3.6.1 Methods of Groundwater Recharge .....	94
3.6.2 Fate of Contaminants in Recharge Systems .....	97
3.6.3 Health and Regulatory Considerations .....	100
3.7 Augmentation of Potable Supplies .....	102
3.7.1 Water Quality Objectives for Potable Reuse .....	102
3.7.2 Indirect Potable Water Reuse .....	103
3.7.3 Groundwater Recharge for Potable Reuse .....	103
3.7.4 Direct Potable Water Reuse .....	104
3.8 Case Studies .....	107
3.8.1 Pioneering Urban Reuse for Water Conservation: St. Petersburg, Florida .....	107
3.8.2 Meeting Cooling Water Demands with Reclaimed Water: Palo Verde Nuclear Generating Station, Arizona .....	108
3.8.3 Agricultural Reuse in Tallahassee, Florida .....	109
3.8.4 Seasonal Water Reuse Promotes Water Quality Protection: Sonoma County, California .....	109
3.8.5 Combining Reclaimed Water and River Water for Irrigation and Lake Augmentation: Las Colinas, Texas .....	110
3.8.6 Integrating Wetlands Application with Urban Reuse: Hilton Head Island, South Carolina .....	112
3.8.7 Groundwater Replenishment with Reclaimed Water: Los Angeles County, California .....	113
3.8.8 Aquifer Recharge Using Injection of Reclaimed Water: El Paso, Texas .....	114
3.8.9 Water Factory 21 Direct Injection Project: Orange County, California .....	115
3.9 References .....	117
4 WATER REUSE REGULATIONS AND GUIDELINES IN THE U.S. ....	123
4.1 Inventory of Existing State Regulations .....	123
4.1.1 Reclaimed Water Quality and Treatment Requirements .....	126
4.1.2 Reclaimed Water Monitoring Requirements .....	130
4.1.3 Treatment Facility Reliability .....	130

---

## ***Contents (continued)***

<b>Chapter</b>		<b>Page</b>
	4.1.4 Minimum Storage Requirements .....	131
	4.1.5 Application Rates .....	131
	4.1.6 Groundwater Monitoring .....	131
	4.1.7 Setback Distances for Irrigation .....	131
4.2	Suggested Guidelines for Water Reuse .....	132
4.3	References .....	140
<b>5</b>	<b>LEGAL AND INSTITUTIONAL ISSUES .....</b>	<b>141</b>
5.1	Identifying Legal Issues .....	141
5.2	Federal Legal Issues .....	142
5.3	State Legal Issues .....	142
	5.3.1 State Water Rights .....	142
	5.3.2 State Liability Laws .....	144
	5.3.3 State Franchise Law .....	144
	5.3.4 State Case Law .....	145
5.4	Local Legal Issues .....	145
	5.4.1 Reuse Ordinance .....	145
	5.4.2 User Agreements .....	146
	5.4.3 Institutional Structures .....	146
5.5	Institutional Inventory and Assessment .....	147
5.6	Guidelines for Implementation .....	147
5.7	Case Studies .....	149
	5.7.1 1979 Wyoming Case: Thayer vs. City of Rawlins .....	149
	5.7.2 1989 Arizona Case: Arizona Public Service vs. Long .....	150
5.8	References .....	150
<b>6</b>	<b>FUNDING ALTERNATIVES FOR WATER REUSE SYSTEMS .....</b>	<b>151</b>
6.1	Decision Making Tools .....	151
6.2	Externally Generated Funding Alternatives .....	152
	6.2.1 Municipal Tax-Exempt Bonds .....	152
	6.2.2 Grant and State Revolving Fund Programs .....	152
	6.2.3 Capital Contributions .....	154
6.3	Internally Generated Funding Alternatives .....	154
	6.3.1 Operating Budget and Cash Reserves .....	154
	6.3.2 Property Taxes and Existing User Charges .....	155
	6.3.3 Special Assessments or Special Tax Districts .....	155
	6.3.4 Connection Fees .....	156
	6.3.5 Reuse User Charges .....	156
6.4	Incremental Versus Proportionate Share Costs .....	156
	6.4.1 Incremental Cost Basis .....	156
	6.4.2 Proportionate Share Cost Basis .....	157
6.5	Phasing and Participation Incentives .....	158
6.6	Sample Rates and Fees .....	158
	6.6.1 Connection Fees .....	158
	6.6.2 User Fees .....	158
6.7	Case Studies .....	159
	6.7.1 Financial Incentives for Water Reuse: Los Angeles County, California .....	159
	6.7.2 The Economics of Urban Reuse: Irvine Ranch Water District, California .....	160

<b>Table</b>	<b>Page</b>
1	Infectious Agents Potentially Present in Untreated Domestic Wastewater .....20
2	Infectious Doses of Selected Pathogens .....22
3	Microorganism Concentrations in Raw Wastewater .....22
4	Typical Pathogen Survival Times at 20-30 °C .....23
5	Inorganic and Organic Constituents of Concern in Water Reclamation and Reuse .....27
6	Typical Composition of Untreated Municipal Wastewater .....28
7	Typical Constituent Removal Efficiencies for Primary Treatment .....30
8	Typical Percent Removal of Microorganisms by Conventional Wastewater Treatment .....30
9	Applicability of Alternative Disinfection Techniques .....32
10	Typical Filtration Process Removal .....34
11	Coagulation-Sedimentation Typical Constituent Removals .....35
12	Summary of Class I Reliability Requirements .....38
13	Recommended Cooling Water Quality Criteria for Make-Up Water to Recirculating Systems .....74
14	Recommended Industrial Boiler-Feed Water Quality Criteria .....76
15	Industrial Process Water Quality Requirements .....77
16	Industrial Water Reuse Quality Concerns and Potential Treatment Processes .....77
17	Crop Salt Tolerance .....84
18	Salinity of Applied Water .....85
19	Recommended Limits for Constituents in Reclaimed Water for Irrigation .....87
20	Summary of Facilities and Management Practices for Percolation Recharge .....96
21	Water Quality at Phoenix, Arizona SAT System .....97
22	Results of Test Basin Sampling Program at Whittier Narrows, California .....100
23	Factors that May Influence Virus Movement in Groundwater .....101
24	Isolation of Viruses Beneath Land Treatment Sites .....101
25	Test Results, Denver Potable Water Reuse Demonstration Project .....105
26	Summary of State Regulations and Guidelines .....125
27	Number of States with Regulations or Guidelines for Each Type of Reuse Application .....126
28	Suggested Guidelines for Water Reuse .....133
29	User Fees for Existing Urban Reuse Systems .....159
30	Percentage of Respondents Opposed to Various Uses of Reclaimed Water in General Opinion Surveys .....167
31	The Tools of Public Participation .....169
32	Extent of Water and Sanitation Services in Urban Areas of Developing Countries .....182
33	Recommended Microbiological Quality Guidelines for Wastewater Use in Agriculture .....185
34	Expected Removal of Excreted Microorganisms in Various Wastewater Systems .....186
35	Quality Criteria of Treated Wastewater Effluent to be Reused for Agricultural Irrigation in Israel .....187

## *Tables (continued)*

<b>Table</b>	<b>Page</b>
36	Typical Land Area Required for Pond Treatment Systems and Secondary Treatment Plants ..... 188
37	Uses of Reclaimed Water in Japan ..... 195
38	Uses of Reclaimed Water in Dual Systems in Japan ..... 195
39	Types of Buildings Using Reclaimed Water in Japan ..... 195
40	Reclaimed Water Criteria in Japan ..... 196
41	Reclaimed Water Standards in Kuwait ..... 196
42	Reclaimed Water Guidelines in South Africa ..... 197
43	Reclaimed Water Standards for Unrestricted Irrigation in Saudi Arabia ..... 198
44	Maximum Concentrations for Reclaimed Water Reused in Agriculture in Tunisia ..... 199
A-1	Unrestricted Urban Reuse ..... 204
A-2	Restricted Urban Reuse ..... 210
A-3	Agricultural Reuse — Food Crops ..... 218
A-4	Agricultural Reuse — Non-Food Crops ..... 227
A-5	Unrestricted Recreational Reuse ..... 237
A-6	Restricted Recreational Reuse ..... 239
A-7	Environmental Wetlands ..... 241
A-8	Industrial Reuse ..... 242
B-1	Abbreviations for Units of Measure ..... 246
B-2	Acronyms/Abbreviations ..... 247

## *Figures*

Figure		Page
1	Actual and Projected World Population .....	1
2	Growth of Cities of >1 Million Population .....	2
3	Phases of Reuse Program Planning .....	8
4	U.S. Fresh Water Demands by Major Uses, 1985 .....	10
5	Total Treated Wastewater Design Flows by State .....	11
6	Total Fresh Water Demands by State, 1985 .....	11
7	Average Residential Water Usage by Type of Use .....	12
8	Average Daily Residential Water Usage Comparison: National, Pennsylvania, & California .....	13
9	Estimated Potable Water Conservation Achieved Through Urban Reuse, City of St. Petersburg, Florida .....	15
10	Three Configurations Alternatives for Water Reuse Systems .....	16
11	Reclaimed Water Supply vs. Irrigation Demand .....	17
12	Generalized Flow Sheet for Wastewater Treatment .....	29
13	Average Monthly Rainfall and Pan Evaporation .....	44
14	Average Pasture Irrigation Demand and Potential Supply .....	45
15	Estimated Storage Required to Commit All Available Reclaimed Water for Pasture Irrigation (Average Condition) .....	46
16	Required Storage Capacity to Meet Irrigation Demands vs. Percent of Supply Committed .....	47
17	Example of Multiple Reuse Distribution System .....	49
18	Florida Separation Requirements for Reclaimed Water Mains .....	52

20	Anticipated Daily Reclaimed Water Demand Curve vs. Diurnal Reclaimed Water Flow Curve .....	56
21	Hydrograph for Diurnal Flows .....	56
22	TDS Increase Due to Evaporation for One Year as a Function of Pond Depth .....	57
23	Potable and Nonpotable Water Use Monthly Historic Demand Variation Irvine Ranch Water District .....	69
24	Potable and Total Water Use Monthly Historic Demand Variation St. Petersburg, Florida .....	69
25	Typical Water Reclamation Plant Process for Urban Reuse .....	71
26	Comparison of Agricultural Irrigation, Public/Domestic, and Total Fresh Water Withdrawals .....	78
27	Agricultural Reuse Categories by Percent in California .....	78
28	Assessing Crop Sensitivity to Salinity for Conventional Irrigation .....	82
29	Divisions for Classifying Crop Tolerance of Salinity .....	83
30	Schematic of Soil-Aquifer Treatment Systems .....	98
31	Number of Drinking Water Contaminants Regulated by the U.S. Government .....	102
32	Denver Potable Reuse Demonstration Treatment Processes .....	106
33	Public Participation Program Required for Water Reuse System Planning .....	169
34	Changes In Urban and Rural Populations in Latin America, Africa, and Asia .....	180

## Acknowledgments

*Guidelines for Water Reuse* was prepared by Camp Dresser & McKee Inc. (CDM) under the direction of Mr. Robert L. Matthews, Officer-in-Charge. Principal authors were Dr. James Crook (Project Director), David K. Ammerman (Project Manager), and Dr. Daniel Okun (Technical Consultant). Contributing authors were Jeffrey F. Payne, Diane C. Kemp, Patrick E. Gallagher, Eric M. Etters, Raymond C. Murphy, Konstandinos Kalimtgis, and Michael G. Heyl. Marlene A. Hobel edited the document and prepared the graphics. The assistance of Denise M. Cormier and Tracie A. Vann is gratefully acknowledged.

Preparation of the *Guidelines* was jointly funded by the U.S. Environmental Protection Agency (EPA) and the U.S. Agency for International Development (AID) through AID's Water and Sanitation for Health (WASH) Contract No. DPE-5973-Z-00-8081-00, Project No. 836-1249. The WASH project is sponsored by AID's Office of Health, Bureau for Research and Development and is managed by Camp Dresser & McKee International, a CDM subsidiary.

We wish to acknowledge the direction, advice, and suggestions of the sponsoring agencies, notably: Mr. Robert K. Bastian with EPA; Dr. John Austin and Dr. Rita Klees with AID; and J. Ellis Turner, Eduardo Perez, and Rick Mattson with the AID/WASH Project.

The following individuals served on an advisory committee during development of the document and provided valuable information and substantive suggestions for improving its focus and content. Their assistance is greatly appreciated. Their review does not necessarily signify endorsement.

Dr. Sergio A.S. Almeida  
Multiservice Engenharia Ltda.  
Rio de Janeiro, Brazil

Dr. William H. Bruvold  
University of California at Berkeley  
Berkeley, California

Dr. Julian Andelman  
University of Pittsburgh  
Pittsburgh, Pennsylvania
